Inch Of Moisture In Monday's Storm

After a few anxious days, during which grain, beets and gardens, got steadily drier, rain started soon after daylight Monday, and when it stopped in the early hours of Tuesday morning more than an inch of rain had fallen, the fields were well soaked up, grass lands looked fresh and green, and every one was happy.

Irrigating was being done as rapidly as possible, but with the ground so dry it was slow work to soak up a field. Now with this rain and warm weather, the crops will fairly jump, and beet thinning will be rushed with all possible speed when the ground dries enough to prevent the weeds getting the upper hand. Gardens, which have been backward to date, because of drouth and cool weather will literally jump now and hoes and cultivators will be popular weapons for a few weeks.

Speaking in Stake Priesthood meeting Sunday J. W. Evans secretary of the Raymond Irrigation District read a letter from P. M. Sauder of the Provincial Irrigation Board, stating that the visible run off of the St. Mary's river watershed was only 54 p.c. of normal, and this coupled with the then dry weather made the crop situation look quite serious. The present storm will relieve this to some extent as while it was raining here, the foothills and mountains received quite a heavy fall of snow to add to the reserve there.

T. K. Roberts and son are building an addition to the south of the Service Centre Garage so that more shop space will be provided. This garage has been severely handicapped because of lack of space and this addition will relieve this situation.

MAURICE HENINGER GETS HIS B. A.

Provo, Utah, May 26—Maurice King Heninger of Raymond will be awarded the degree of Bachelor of Arts at the sixty-fifth annual Commencement exercises of Brigham Young University which will be held June 4th in the new Joseph Smith building on University Hill.

History will be recalled and new history made during Commencement week. On June 1st, birthday of Brigham Young, who founded the institution sixty-six years ago, the graduates will march into the Joseph Smith building for the baccalaureate services, first exercises of any kind to be held in the structure. The speaker will be Elder Harold B. Lee, newly appointed member of the Quorum of Twelve. As managing director of the Church Welfare Program, he had an important part in the erection of the building.

The Emeritus Alumni Club, for all who attended B. Y. U. fifty or more years ago, will be organized on June 3, and all who studied under Dr. Karl G. Maeser will be honored. Dr. Richard R. Lyman of the Council of the Twelve, and Alumni Secretary Cornelius R. Peterson have this in charge.

On June 4th the graduates will hear an address prepared by United States Supreme Court Justice George Sutherland, who attended B. Y. U. sixty years ago. More than 425 young men and women will receive diplomas

SCOUT COUNCIL MEETING

The monthly meeting of the Boy Scout Council and Boy Leaders of the Taylor Stake was held at the Stake House, Raymond, at 8 p.m. Wednesday evening last, with District Commissioner Chas. Matkin in the Chair and fifty Scoutmasters and Leaders present, including Stake President T. Geo. Wood.

A delicious banquet was served by the Ladies of the Stake Y.W.M.I.A., and the speaker of the evening was District Commissioner D. A. Allred of the Alberta Stake, who spoke of the problems of the Boy Scouts in his district.

The main topic of discussion was the District Scout camp for this year to be held at Waterton Park, which was passed by unanimous vote of those present. Two numbers from the Boys Quartette of Stirling, and an accordion solo, by Rhinold Thur were enjoyed by the group.

It was decided to hold this meeting each month on a week night instead of in conjunction with the Monthly Priesthood Meeting of the Stake.

Stampede Machinery Commencing To Move

The organization work for Raymond's Annual Stampede and Race Meet is finished and the next month will see various committees busy arranging the many details connected with an enterprise of this sort and seeing that everything is ready when the time arrives.

The advertising Committee has the advertising planned and part of it printed and a campaign is being organized which will literally "Plaster" southern Alberta with Stampede bills, and a number will be mailed to Montana along with prize lists and other literature. Watch for the big bills and programs.

Now, Mr. John Q. Citizen, drag out that big hat, those cowboy boots that bright neckerchief, and let's dress up for the show. Let people know we're a Stampede town. It kindles an enthusiasm that cannot be created any other way, and will do a lot of good to create the proper atmosphere for the big Stampede. In view of the purpose for which the proceeds are to be used, this year's Stampede should be "bigger and better" than ever. Let's make it just that.

Geo. Schneidt left early this morning on a short trip to Edmonton and Ponoka.

Geo. Brewerton took the plane from Lethbridge this week for Winnipeg on a brief business trip.

With Raymond definitely out of the baseball league couldn't we start a softball league to enter, some league, even a town one to kindle a little interest.

Elders Willis Taylor and Bruce Heggie were speakers at the 2nd Ward Sacrament meeting Sunday evening. Because of the visit of the military convoy the attendance was rather small but a very interesting meeting was held.

War Loan Will Open Monday

On Monday, June 2nd, Canada's War Loan campaign opens lined up to assist in putting over this gigantic enterprise across the Dominion are capable, willing and patriotic Canadians; men and women who realize that to be free and to protect our democracy, we must sacrifice & help in keeping our government supplied with funds with which to purchase the ammunition, armaments and supplies needed for the prosecution of the war.

As a build up for the Loan campaign, a Victory torch ceremony was held in Victoria last Saturday, and after that ceremony, the torch was put aboard a bomber and taken to Vancouver, B. C., and since that time has been in Lethbridge, Calgary, Edmonton and Medicine Hat in Alberta, and is now in Saskatchewan on its way to Eastern Canada, and thence to Great Britain for presentation to Prime Minister Winston Churchill.

In each centre where the torch stops ceremonies are held and included in the program which features prayers for peace and patriotic addresses the following solemn pledge is made by assembled throngs:

"I hereby declare my belief in Almighty God and reaffirm my loyalty and allegiance to His Majesty the King, and further declare my support of British institutions.

"I pledge myself and my all to hold the Torch on high, and to march shoulder to shoulder with the United Kingdom and her Allies in our righteous cause to Victory and enduring peace."

Every Canadian should take this pledge to heart. We should consider it with respect to the forthcoming Loan. It is our duty and privilege to subscribe to the limit in this loan. The Government is making it possible for these to be purchased on the instalment plan, and before anyone says they cannot purchase a bond, they should acquaint them

selves very thoroughly with the conditions on which purchase may be made and see if there is not some way. Committee men will make it their business to explain all the details to the people whom they contact and we, the people should make it our business to render all possible assistance.

A public program is planned for Monday, June 2nd, to launch the campaign for this Loan, and during the program at least, and possibly for the entire afternoon business houses will be closed, and the schools will also declare a half holiday.

A parade is planned, and the High School Art classes are making posters of notables of the earth, including Herr Hitler and banners which will be carried in a mammoth parade which will precede the program to be held at the Town Hall corner. This parade and demonstration is expected to be the biggest thing of its kind and everyone is invited to join in putting it over.

Included in the program numbers will be music by the High School band making its premiere appearance, congregational singing, solo numbers and speeches, which will include a speech from some member of the Lethbridge committee if arrangements can be made. Complete details are not known as yet and therefore cannot be included in this issue.

To inaugurate the Victory Loan locally at 2 p.m. the High and Public School students will meet at the Opera House and parade with flags and banners to Cenotaph for program featuring band music and patriotic songs.

An outline of the Victory Loan will be made by Unit Organizer Jas. H. Walker, to be followed by a demonstration by the local Field Park Co., under the direction of Staff Sergt. Dyson.

Stores and offices will close during this civic program.

Britain Still Mistress Of The Seas

Germany scored an ace in a naval encounter in the straits of Denmark between Iceland and Greenland on Saturday when a lucky shot from the German Battleship Bismark, struck the magazine of H.M.S. Hood, 42,000 ton battleship of the British fleet, and when the magazine exploded the Hood was blown to bits. It was a serious loss to the British, being the second capital ship lost, and making the total to date, just what it was at the start of the The "King George," 35,000 tons, and another of the same size put into service since the war began.

Sunday Hitler was making big boasts about the loss to Britain of this ship and that her rowing on the sea was definitely weakened. His gloating was, however short lived. On Monday the Bismark, crippled in the first encounter until her speed was cut down, was overtaken and sunk by torpedoes from the "Swordfish" planes of the fleet air arm, and her crew of 1476

men lost. This leaves Germany with one capital ship on the seas the Scharnhorst and Gneisenau lying in Brest harbor badly damaged from R.C.A.F. attacks so we say with justifiable British pride "Britannia rules the waves."

Hitler's campaign in Crete seems to be going none too good. His losses have been very heavy and the British navy in the Mediterranean have prevented the landing of a single soldier from boats or transports. One troop ship was sunk and the water was filled with the bodies of drowned and drowning men crying for help which did not come. Thousands of French soldiers in Syria have crossed into Palestine and joined the Free French movement to fight with the Allies. All in all while reverses are bound to come, and France's action in swinging with the Axis powers is a great surprise to the world, the Allies position seems as good or better than it did a week ago. Latest reports are that Italian dominion in Ethiopia and Africa at large is gone

Raymond Invaded Sunday By Convoy

NEWS NOTES

Buy War Savings Certificates.

Send the Recorder to the Missionaries and the boys in uniform. They like it and we are always glad to do our part.

Lloyd Gilmour of the Lethbridge Herald circulation staff was a Raymond visitor on Tuesday.

Owen Larson and Jos. Thompson are painting their homes, and it makes a nice improvement in their appearance.

More rain Monday night and Tuesday forenoon brought our total for the present storm up to about an inch and a half.

People from Welling, Magrath Stirling and a few from Picture Butte were here Sunday evening for the demonstration and band concert provided by the military convoy.

Mr. and Mrs. Gordon Brewerton have visited in Raymond for the past week. Gordon has been helping in the store while George is away in Winnipeg.

H. S. Allen, Lee Brewerton, Geo. Ralph, et al. were in Lethbridge Thursday for a meeting of the Victory Loan organization for this end of the province. They were in session most of the day.

If you have anything to Buy, Sell or Trade, Lost or Found, or what not, try a want ad. for quick results. Some interested party is almost sure to see your message.

Mrs. H. Brewerton is leaving today for Los Angeles, Cal., to make her home. We wish her every happiness and success and she leaves with the very best wishes of her many friends in Raymond.

Mrs. S. B. Card, Jr., was in Edmonton last week for the convocation exercises at the University of Alberta, when her sister, Miss Nellie Coyle, received her degree in Household Economics.

Elder Howard Hamling of the Tyrell's Lake branch who is leaving soon for the Canadian Mission was a speaker in the Stake Priesthood Meeting Sunday.

Dr. Frank Hall talked to the Rotary Club Monday, speaking from an article on "Canada's Wheat Surplus." A guest at the luncheon and also a speaker was Major Jenkins, recruiting officer for M. D. No. 13 who spent the day in town. Despite a small attendance a very interesting meeting was held.

The Baseball League for the season has been drawn up, and Raymond will be without an entry this year, the first time, we believe since Southern Alberta leagues were started. The absence of several players from the town and a seeming lack of interest by players and fans, resulted in no entry being made.

My. and Mrs. Chester Asplund of Glenwood were Raymond visitors Sunday.

FACING REALITY

There comes a time in the lives of most men when they come face to face with reality and cannot dodge it. Such a time has arrived for every man and woman in Canada who has a sum of money over and above that needed for ordinary expenditures.

There are few Canadians who do not treasure money, either for the protection it affords the individual against unforeseen calamity or for the value it represents in terms of goods which it will buy. Some treasure money because it is the concrete result of years of hard work. Others are reluctant to part with mon-

ey because to them it is a sheltering arm around the family.

Now, however, Canadians are faced with the realization that no matter how highly they regard their personal cash reserves, they must loan it in order to keep it.

The battle against Germany can be viewed in part as a battle in behalf of Canadian cash in hand. Let Germany win, and assets of Canadians will dry up almost to the vanishing point.

Great Britain, Australia, New Zealand, South Africa, India and Canada have been left alone to fight the Nazi monster. The challenge, undoubtedly the most stupendous in world history, demands the active help of every Canadian. Those with money, be it fifty dollars or two hundred and fifty thousand dollars, must loan their cash to the government if Canada is to carry on with her present share in the big battle.

The man or woman who shrugs his or her shoulder and deliberately attempts to duck from under the responsibility of each individual in this time of national crisis will earn the contempt of his fellow citizens.

MORE FORAGE CROPS BEING SOWN

36 farmers in the Shepard Municipality, just east of Calgary, have taken delivery of their forage crop seed distributed under the Provincial-Municipal Forage Crop Policy.

Included in the seed for this Municipality are: Brome Grass, Alfalfa, Crested Wheat Grass and Sweet Clover.

District Agriculturist, B. J. Whitbread, of Calgary, has been busy assisting the farmers with their plans for seeding these crops. Many of them have had little experience in the growing of forage crops and require assistance respecting the choice of suitable land and proper seeding methods.

The development of permanent pastures and hay meadows through sowing down land to forage crops is, of course, one phase of the Wheat Acreage Reduction Program, but it is also a sound farming practice. Not only are better pastures and feed supplies provided, but fibre is added to the soil and

POISONOUS WEEDS AND LIVE STOCK

It has been estimated that there are more losses of cattle and sheep from poisonous plants than any other single factor.

During the dry spring when grass growth is slow, live stock are attracted to low ground here the grass is more succulent and green. In such low sections some poisonous plants are found. Water Hemlock is especially common in such areas, and if pastures contain this weed, they should be fenced off if possible.

By allowing live stock to have free access to salt at all times, they will not develop a depraved appetite and will, therefore, not go in search of new plants, which may be poisonous to them. Access to salt and a little care in the management of the pasture may prevent losses of valuable live stock.

Why CANADA MUST BORROW \$600,000,000

A Statement by the Minister of Finance

In money alone, this war is costing Canada in round figures, \$4,000,000 a day. That is three and one-quarter times the daily cost of the last year of the last war. This conflict costs so much more because it is a battle of giant, swift machines . . . as well as of men. And to build other than the very best machines would be futile. They must be worthy of our men.

Canada dare not . . . and will not . . . sacrifice men for lack in quality or quantity of fighting machines. Hence we must produce them on a scale hitherto undreamed of.

To do this, Canada needs now to borrow from her citizens at least \$600,000,000 in addition to the revenue raised by taxes. To obtain this money Canada will on June 2nd offer Victory Bonds.

Fortunately, Canadians have the money to buy these Victory Bonds. This is shown by a greatly expanded

national income and by record savings deposits.

If every person who has savings or who can make payments out of wages or income will invest in Victory Bonds, the Loan will be quickly subscribed. But the wholehearted support of every citizen is necessary.

What Canadians have done before, Canadians can and will do again. Our population was less than nine millions in 1918 and 1919. Yet in November, 1918, our people invested \$616,000,000 in Victory Bonds. Eleven months later, in October, 1919, they invested \$572,000,000. The total subscribed for Victory Bonds in those two loans was \$1,188,000,000. This year, with our population increased to more than twelve millions, the nation that did it before can do it again—and in greater measure.

The terms of the Loan will be announced May 31st. Get ready to buy every Bond that you can.

WE MIGHT WEEP A LITTLE

Over, in England now, there is a radio comedian who sets his listeners laughing with recipes like the following:

"Take a large sirloin steak, smother it liberally with onions spread with a thick coating of grated cheese, and fry in deep butter."

If this radio program could be rebroadcast in Canada with all the accompanying sounds of laughter, from the English audience doubtless many thousands of Canadians who can get all the steak and onions and butter they want, would decide to increase the size of their Victory Loan Bond purchases.

WHAT WOULD YOU GIVE
FOR VICTORY?

WARNING AGAINST MAIL-
ING CIGARETTE-LIGHTER
FLUID

Despite the recent caution given against including inflammable substances in the mails, Hon. William P. Mulock, K. C., Postmaster-General, states that this dangerous and illegal practice is still continuing.

Although the Canadian Postal Corps authorities report that the recent warning against enclosing matches in soldiers' parcels has evidently had the desired effect, cigarette lighter fluid is still being mailed in considerable quantities and on one single day this month, eight tins, which had been listed on the accompanying Customs Declaration forms, were removed from parcels at the Base Post Office, Ottawa.

The Public are advised that cigarette-lighter fluid must not be sent through the mails. The danger of doing so, especially under war time conditions must be apparent, for should this substance ignite it might cause great loss to the mails or, postal premises, and if in transit, to the mail train or the ship; as well as injury to postal employees. Some weeks ago attention was directed to the fire hazard caused by matches which ignited in a parcel already sorted into a mail bag at the Base Post Office.

Postal Regulations prohibit the mailing of any inflammable, explosive, dangerous or destructive substance or liquid, or any matter, etc. likely to injure any letter or other mailable matter, or the person of any officer or servant of the Post Office. Public co-operation is solicited in helping the Canadian Postal Corps safeguard the mails.

WHEN SHOULD CROPS
BE IRRIGATED

When shall we start to irrigate our crops? Will early irrigation injure crops. These are two questions that are frequently asked and likely occur in the minds of everyone who has irrigation water to use. These questions can be answered definitely. Start to irrigate now if it is dry. Grain crops are not injured by early irrigation.

Since the establishment of the Lethbridge Experimental Station in 1906, irrigation has been a major matter for investigation. For over 20 years detailed experiments have been conducted for the express purpose of studying the effect of irrigation at different stages of crop growth. The accumulated evidence from these experiments indicate quite clearly that the grain and hay crops usually should be irrigated early in the season and all other crops should be irrigated before the soil gets very dry.

Almost everyone with irrigation experience knows that it is good practice to irrigate hay as early as possible. At the Experimental Station, it has been found that alfalfa irrigated in early May usually produces a much heavier first crop than does alfalfa where the irrigation is delayed until the soil gets dry. Alfalfa irrigation here is started just as soon as the water is available—the same is true of grass hays or pasture lands. That is why spring flood waters are usually so valuable to help produce a hay crop in areas where only spring floods are available. Grain crops also can be irrigated early in the season. If spring floods present the only means of irrigation, this can be run over before the ground is seeded or immediately after seeding, or at any time the water is available.

Young grain is not injured by irrigation. This has been repeatedly shown in experiments at the Station. Extra early irrigation of grain has not been found to be harmful even though it turns the colour of the young grain plants to a light green instead of the normal rich dark green. In fact, it is usually desirable because it insures a satisfactory supply of soil moisture and so removes the danger of the plants being injured by drought before the water is applied.

One very important factor regarding the early use of water is that usually these are more water to use in May and early June than later in the season. Where water cannot be stored in reservoirs but must be diverted from running streams, it must be used when the streams are flowing or it cannot be used at all. In such cases, the only reservoir available is the soil and so to save this water, it should be applied to the field so it can soak into the soil.

Grain and hay plants can use the water in the top 5 to 8 feet of soil so this profile of soil should be considered as his soil reservoir by the farmer who has irrigation. This immediately suggests the adoption of the practice of irrigating when the water is available so that the water can be stored in this soil reservoir. It is just common sense then to use the water when it is available for use. We can rest assured that very seldom do we injure the crops by using the water when it is available.

The annual Field Day of the Alberta Percheron Club will be held this year at the Lethbridge Experimental Station, Saturday May 31.

Montgomery Advertiser: May be this move to conserve aluminum for defense uses will restrict the boiler-burning activities of amateur male cooks.

Wood Construction: It's a great kindness to trust people with a secret. They feel so important while telling it.

Milwaukee Journal: Of course for the younger set there is still the CCC, which affords all the advantages of the military life, without second lieutenants.

TRANS-CANADA AIR LINES
NEW AIR MAIL SERVICE
BETWEEN TORONTO AND NEW YORK

Toronto, May 23—Trans-Canada Air Lines made its first air mail flight between Toronto and New York on April 30th. Final arrangements for the inauguration of the air mail service were made between A.M. Gibson, district director of postal service and D.R. MacLaren, superintendent of stations of the T.C.A.

"There will be two air mail trips daily, each way," stated Mr. Gibson. "The planes will leave Toronto at 11 a.m. and 12.30 a.m. EDT. The midnight plane is specially designed to meet the requirements of the business men, for it offers them the additional advantage that, after the day's business is completed, they may have a direct mail connection which will assure their letters and reports being included in the first morning delivery in New York." The speedy New York air mail service will be of benefit to business throughout Western Canada. Mr. Gibson emphasized, citing the direct morning plane connection with the T. C. A. transcontinental service to Vancouver. A letter posted in Vancouver before 4 p.m. will be in New York shortly after noon the following day. Similar service will be available from New York.
